Witold Grzesiak

COMPUTER SCIENCE · DATA/BI · AUTOMATION

witold.g83@gmail.com · +48 531 310 527 · Zielona Góra · GitHub · LinkedIn

PROFESSIONAL PROFILE

Computer Science MSc and Automation & Robotics BEng, pursuing postgraduate Data Analytics studies at WSKZ since October 2026. I combine systems troubleshooting and user support with Python programming, tool integrations and ETL/BI projects. I develop solutions that streamline data, document and application workflows.

TECHNICAL SKILLS

Python · SQL · ETL · SQLite · Excel · Flask · API/JSON · Nextcloud · OpenProject · TensorFlow · Computer Vision · Linux

PROFESSIONAL EXPERIENCE

Administrative Assistant Nov 2025 – present

Marshal's Office of the Lubuskie Voivodeship

- Gathered user requirements and developed Python scripts and applications to streamline data and document workflows.
- Supported Nextcloud, OpenProject and API/JSON integration, tested tools and diagnosed user-reported issues.
- Prepared summaries, analyses, procurement documentation and technical findings for technical and non-technical audiences.

Junior Remote Technical Support Specialist Aug 2023 – Dec 2024

Ekoenergetyka-Service

- Investigated EV charging incidents using logs, device parameters and network communication diagnostics.
- Identified likely causes and coordinated corrective steps with engineers and field technicians.
- Performed firmware updates, configuration changes and functional checks following intervention.
- Provided L2 support to customers and service partners; communicated ticket status, findings and next steps.

Junior Field Service Specialist Feb 2023 – Aug 2023

Ekoenergetyka-Service

- Troubleshot equipment on site, analysed technical parameters and performed functional tests after repairs.
- Collaborated on EV charger installation, commissioning and routine inspections.

Service Assistant Jul 2022 – Feb 2023

Ekoenergetyka-Service

- Assisted teams with equipment installation, diagnostics, repair and maintenance.

Hospitality Leader Jun 2019 – May 2020

FMD Jadwiga Wieczorek · McDonald's

- Coordinated team tasks, communicated with customers and responded to operational issues.

SELECTED PROJECTS AND OUTCOMES

Dynamic Forms & Document Workflow Platform Python · Flask · Nextcloud · JSON · PDF

Problem: manual handling of submissions and documents. Contribution: JSON-driven forms, validation and storage, PDF generation, configurable declarations and agreements, verification of uploaded signed files, access tokens, event notifications and audit logs. Refactored routes/services/repositories and added pytest tests. Code & documentation ↗

Retail Sales BI Dashboard Python · SQL/SQLite · HTML/JavaScript

Problem: analysing revenue and margin across retail transactions. Contribution: generated 12,000 synthetic orders, built a star schema, reconciled KPIs and developed an interactive offline HTML report. DAX and SQL Server are documented extensions, not a completed .pbix report. Code & documentation ↗

Incremental ETL & Data Warehouse Python · SQL/SQLite · ETL

Problem: incremental loading without duplicates or loss of customer history. Contribution: implemented local ETL with watermarks, SCD Type 2, data validation, audit logs and repeat-run tests. SQL Server and Azure Data Factory are documented architecture targets. Code & documentation ↗

Ki-67 Image Segmentation (MSc Thesis) Python · TensorFlow · Computer Vision

Problem: supporting proliferation assessment in IHC images. Contribution: prepared masks from annotations, trained and compared U-Net, Stacked U-Net and Attention U-Net; evaluated IoU, precision, recall and F1. Experimental research, not a clinically validated solution. Code & documentation ↗

Local AI/RAG Prototype FastAPI · Qdrant · Streamlit · Docker

Problem: retrieval of information from documents. Contribution: prototyped a local language model, vector indexing, API and user interface. Prototype only; not claimed as production deployment.

EDUCATION

Postgraduate studies — Data Analytics Oct 2026 – present
WSKZ · Higher School of Vocational Education

MSc in Computer Science Feb 2023 – Jun 2025
University of Zielona Góra · Information Systems Engineering

BEng in Automation & Robotics Oct 2019 – Feb 2023
University of Zielona Góra · Industrial Automation

INTERPERSONAL SKILLS

Customer and user communication · Engineering-team collaboration · Problem-solving · Task coordination
